

JUST YOUR EARS

PIERCING AFTERCARE FOR **LOBES**

CLEAN TWICE A DAY OR AS NEEDED FOR 6 WEEKS. 6 MONTHS TO FULLY HEAL

1. SPRAY

SALINE ON FRONT & BACK
LET SIT 10 SECONDS

2. WIGGLE

BACK & FORTH 1-2 TIMES

3. INSPECT

EARRINGS ARE "LOOSE"
AND IN THE NOTCH

4. PAT/AIR DRY

USING PAPER TOWEL, NO
Q-TIPS OR COTTON BALLS

1. Wear piercing earrings on the loosest setting and in the notch for 6-8 weeks. Tightness can cause embedded earrings. The security notch helps prevent earrings from easily coming off. Tug firmly to remove.
2. Wear earrings at ALL times, 24/7, holes can close within minutes/hours. For irritated ears, leave earrings IN, figure out the irritation and fix the problem. Common Irritations- too tight, too short, metal allergy or trauma/tugging.
3. Don't touch, twist or take your earrings out during the initial 6 week healing period. Ear lobes will take 6 months to fully heal on the inside.
4. NO swimming immediately following a piercing, wait at least 7 days. If you choose to swim, clean well right after.
5. Change after 6-8 weeks. Choose quality, small, straight post studs. No dangles or circular hoops for 6 months. We carry hard to find flat back sleeping earrings, baby hoops and earrings that do not make even sensitive ears hurt!
6. When changing, use vaseline to lubricate earring posts for 6 months to avoid irritation on the inside of the lobe. Avoid changing too often for 6 months.
7. To avoid hole closures, wear earrings at all times for about 1 year.
8. Warm saline soaks help with piercing irritations. Mix 1 cup hot water and 1/8 tsp non iodized sea salt, soak ear for 3-5 min or wad up paper towels to make a warm compress. Soak twice per day in addition to regular cleaning.
9. Don't use ointments like Bactine/Neosporin, we want a tunnel not a scab.
